Level: Undergraduate

SYLLABUS

- 1. Course name: Data Acquisition System and SCADA
- 2. Course code: SCDA420946
- **3.** Credits: 2 (2/0/4)

Duration: 15 weeks (30h main course and 60h self-study)

4. Instructors:

- 1- Truong Dinh Nhon, PhD
- 2- Ngo Van Thuyen, PhD
- 3- Quach Thanh Hai, PhD
- 4- Ta Van Phuong, MEng

5. Course conditions

Prerequisites: Digital systems, Electric Circuit Corequisites: Digital systems, Microprocessor.

6. Course description

This course provides students the knowledge of the structure, classification, and application of the data acquisition system and control. The processing and operating principle of the signal processing unit, the practical signal processing units and the programming technics to collect the data in real systems.

Besides, students are introduced the knowledge of the SCADA system and some specific software to design the SCADA system.

7.	Course	Goals

Goals	Goal description (This course provides students:)	ELOs
G1	The structure of the data acquisition system for measurement and control systems	01 (H)
G2	The structure of OPC and the data exchange of the OPC	02 (M)
G3	An ability to design and program the SCADA for the industrial systems.	11 (H)
G4	An ability to use documents in English	06 (H)
G5	An ability to use methods in designing system using the SCADA	07 (M)

* Note: High: H; Medium: M; Low: L

8. Course Learning Outcomes (CLOs)

CLOs		Description	
		(After completing this course, students can have:)	
	G1.1	The ability to analyse the structure and function of the basic units of	01
G1		the DAQ systems.	07
	G1.2	The ability to program for the DAQ systems.	11

	G2.1	The ability to analyse the structure of the OPC systems.	02
G2	G2.2	The ability to select the suitable OPC systems.	01
			11
	G3.1	The ability to present the structure of the SCADA systems, the basic	01
C		requirements of the SCADA systems.	02
G	G3.2	The ability to select the suitable SCADA software of the industrial	01
		systems and program for the selected systems.	11
G4	G4.1	The ability to communicate in English and work effectively as a	06
		member and leader in teams.	

9. Study materials

- Textbooks:

[1] *Data Acquisition and Control Handbook*, A guide to Hardware and Software for Computer-based Measurement and Control, Keithley.

- References:

[2] *Practical Data Accquisition for Instrumentation and Control System*, John Park and Steve Mackay, 2003.

10. Student Assessments

- Grading points: 10
- Planning for students assessment is followed:

Туре	Contents	Linetime	Assessment techniques	CLOs	Rates (%)
Midterms					50
Exam01	The structure of the DAQ systems	Weeks 4	Individual paper assessment in class	G1.1, G2.1,	10
Exam02	Design of DAQ systems using microcontrollers	Week 8	Working in groups	G1.1, G1.2, G4.1	20
Exam03	Design of SCADA systems for the specific industrial requirements	Week 12	Working in groups	G3.1, G3.2, G4.1	20
Final exam				50	
Final Exam	 The project covers all contents related to the expected learning outcomes of the course. Students are required to design a specific SCADA system by themself. 		Working in groups	G1.2, G2.1, G2.2, G3.1, G3.2, G4.1	

11. Course details:

Weeks	Contents	
1,2	Chapter 1: <introduction and="" control<="" daq="" of="" th="" the=""><th></th></introduction>	

	SYSTEM> (4/0/8)	
	A/Contents and teaching methods: (4)	
	Contents:	
	1.1 Introduction to the DAQ and Control systems	
	1.2 Structure and function of the basic units of the DAQ and	G1 1
	control system	G4 1
	1.3 Classification, selection and estimasation of the DAQ and	07.1
	control systems.	
	Teaching methods:	
	+ Presentation	
	+ Group discussion	
	<i>B</i> /Self-study contents: (8)	G1.1
	+ The units of the real DAQ systems	
	Chapter 2: < SIGNAL PROCESSING > (6/0/12)	
	A/Contents and teaching methods: (6)	
	Contents:	
	2.1 Sensors and processing units	
	2.2 ADC and DAC systems	G1.1
	2.3 The structure of the real DAQ systems	G1.2
	2.4 The SCADA software	G4 1
3,4,5	Teaching methods:	01.1
	+ Theoretical lectures	
	+ Presentation	
	+ Group discussion	
	<i>B</i> /Self-study contents: (12)	C1 1
	+ The factors that effective to the accuracy of the ADC and DAC	GI.I
	systems	GI.2
	+ Exercises	G4.1
	<i>Chapter 3:</i> < SCADA SYSTEMS > (4/0/8)	
	A/Contents and teaching methods:(4)	
	Contents:	
	3.1 Introduction to SCADA systems	G1 1
	3.2 The structure of the SCADA systems	G3.1
	3.3 Some basic SCADA systems	G3.2
6.7	Teaching methods:	G4.1
0,,	+ Theoretical lectures	
	+ Group discussion	
	+ Questions	
	<i>B</i> /Self- study contents: (8)	G3.1
	+ Find some real SCADA systems on the internet	G3.2
	+ List some basic specifications of these SCADA systems	G4.1
8,9,10	<i>Chapter 4:</i> < DAQ SOFTWARE > (6/0/12)	

	A/Contents and teaching methods: (6)	
	Contents:	
	4.1 Specifications of the DAQ software	
	4.3 Introduction to OPC	G1.1
	4.3 Specifications of the OPC Server	G3.1
	4.4 Some OPC using in industry: Rslinx, KeepServer, I/O	G3.2
	Server, SimaticNet, OPC Link, Factory Suite Gateway.	G4.1
	Teaching methods:	
	+ Theoretical lectures	
	+ Group discussion	
	+ Group project	
	<i>B</i> /Self- study contents: (12)	
	+ Data transfer between PLC and SCADA systems	G3.2
	+ Expansion inputs/outputs for multiplexers and demultiplexers.	G4.1
	+ Exercises	
	Chapter 5: < DESIGN SCADA SYSTEMS > (10/0/20)	
	Chapter 5: < DESIGN SCADA SYSTEMS > (10/0/20) A/ Contents and teaching methods: (10)	
	Chapter 5: < DESIGN SCADA SYSTEMS > (10/0/20) A/ Contents and teaching methods: (10) Contents:	
	Chapter 5: < DESIGN SCADA SYSTEMS > (10/0/20) A/ Contents and teaching methods: (10) Contents: 5.1 Some requirements for designing SCADA systems	612
	<pre>Chapter 5: < DESIGN SCADA SYSTEMS > (10/0/20) A/ Contents and teaching methods: (10) Contents: 5.1 Some requirements for designing SCADA systems 5.2 Step for designing SCADA systems</pre>	G1.2
	<pre>Chapter 5: < DESIGN SCADA SYSTEMS > (10/0/20) A/ Contents and teaching methods: (10) Contents: 5.1 Some requirements for designing SCADA systems 5.2 Step for designing SCADA systems 5.3 Designing SCADA systems using WinCC, Factory Talk,</pre>	G1.2 G2.1 G2.2
	<pre>Chapter 5: < DESIGN SCADA SYSTEMS > (10/0/20) A/ Contents and teaching methods: (10) Contents: 5.1 Some requirements for designing SCADA systems 5.2 Step for designing SCADA systems 5.3 Designing SCADA systems using WinCC, Factory Talk, Intouch, Labview software</pre>	G1.2 G2.1 G2.2 G3.2
11,12,13,14,15	Chapter 5: < DESIGN SCADA SYSTEMS > (10/0/20) A/ Contents and teaching methods: (10) Contents: 5.1 Some requirements for designing SCADA systems 5.2 Step for designing SCADA systems 5.3 Designing SCADA systems using WinCC, Factory Talk, Intouch, Labview software Teaching methods:	G1.2 G2.1 G2.2 G3.2
11,12,13,14,15	<pre>Chapter 5: < DESIGN SCADA SYSTEMS > (10/0/20) A/ Contents and teaching methods: (10) Contents: 5.1 Some requirements for designing SCADA systems 5.2 Step for designing SCADA systems 5.3 Designing SCADA systems using WinCC, Factory Talk, Intouch, Labview software Teaching methods: + Theoretical lectures</pre>	G1.2 G2.1 G2.2 G3.2 G4.1
11,12,13,14,15	<pre>Chapter 5: < DESIGN SCADA SYSTEMS > (10/0/20) A/ Contents and teaching methods: (10) Contents: 5.1 Some requirements for designing SCADA systems 5.2 Step for designing SCADA systems 5.3 Designing SCADA systems using WinCC, Factory Talk, Intouch, Labview software Teaching methods: + Theoretical lectures + Demo for students</pre>	G1.2 G2.1 G2.2 G3.2 G4.1

12. Learning ethics:

- Home assignments and projects must be done by the students themselves. Plagiarism found in the assessments will get zero point for midterm and final scores

- 13. First approved date: August 01 2012 14. Approval level: Dean Department Instructor Nguyen Minh Tam, PhD Nguyen Thanh Hai, PhD Truong Dinh Nhon, PhD
- 15. Syllabus updated process

1 st time: Updated content dated	Instructors
2 st time: Updated content dated	Head of department
