New Graduates! Join our Engineering Team!

Design and Build your Career, with a Global Leader!

You're finishing your studies or will finish soon and must make one of the most important decisions of your life: **where to begin your career**. Join us at eSilicon – a great place to work, live and play.

eSilicon is the World's Largest Independent Provider of Semiconductor Design and Manufacturing Services (SDMS). Our strength is in developing and delivering complex chips using the latest technology which keeps our professional skills at the cutting edge. eSilicon Vietnam provides a friendly team-oriented & professional work environment that includes:

- Competitive compensation package including lunch and internet allowances
- Professional technical training and career development opportunities
- Opportunities for travel on local and international assignments
- Comprehensive Private personal health and accident insurance

Engineering Opportunities

To support business growth, multiple opportunities exist for New Technical Graduates (BSEE or MSEE) to join our Engineering Graduate Program in **HCM City** working in the following areas.

1. **Circuit Design** *(Digital/Analog – CMOS circuit design at transistor level for Memory IPs, IOs)*
2. **Layout Design** *(Physical custom design – mask design for Memory IPs, Standard Cells, IOs)*
3. **DFT Design** *(Design for Test for ASIC)*
4. **Chip Tester**
5. **Java Developer**

Selected graduates will receive specialized technical training upon joining to work in our teams.

New Graduate Requirements

- Bachelor or MS Degree in Electronics Engineering/Telecommunication **(Job areas from 1 - 4)**
- Computer Science / Information Technology **(Job area 5)**

Background requirement

Background requirement (for areas from 1 - 4)
- Device Physics (CMOS), Circuit theory, Digital/Analog circuit design, Digital/analog systems
- Skills of using EDA tools (Simulator, Design, Verification) and Linux/Unix are preferable

Background requirement (for areas 5)
- Programming language: Java, J2EE framework

Other key requirements for all jobs
- Strong GPA score and completion of relevant subjects
- A good command of **English** both verbal and written
- Strong interpersonal communication and team working skills
- Professionalism, Critical/Logical thinking, future goals focused
- Enthusiasm and ability to assume a high level of responsibilities
- High commitment to continuous learning
- Previous internship with a Semiconductor company is **a plus!**

How You Can Join eSilicon

If you meet the New Graduate Requirements then please **fill out the information in the google form: http://goo.gl/forms/NlzpUOIHCB.** For any further information please contact Ms. Thuy Nguyen: *ntthuy@esilicon.com*

Please email your CV and supporting documents to **careers@esilicon.com**
